BOULEVARD NURSERIES

KEMPENAAR & CHRISTENSEN, PROPS.

NEWPORT, R. I.

1940
RETAIL PRICE
LIST

LISTINGS: We have listed all material under its botanical name as given in *Standardized Plant Names*. Immediately following the botanical name, we have endeavored to give the average ultimate height that the plant may be expected to attain. Of course this will vary according to climatic and soil conditions. See Index of Common Names on inside back cover.

PRICES: Prices in this book cancel all previous listings. Prices are based on our selection from first class nursery row material; individual selection of plants by customer, or specimen plants will carry an additional charge of 20%.

GUARANTEE AND RESPONSIBILITY: We cannot guarantee stock planted out of season, nor can we guarantee stock destroyed by drought, hail, winter injury or acts beyond our control. In no case will we accept any monetary responsibility on the loss of plant material, but we assure our customers that all just complaints will be cheerfully rectified with proper replacements at the earliest favorable planting time.

DELIVERY: All material sold F.O.B. Nursery, no extra charge for loading bulk trucks or car lots. Special packing and crating at cost. There will be a charge for special delivery service.

TRIAL GARDENS: We maintain a trial garden with over 200 varieties of roses and one of the largest selections of evergreens in New England for the purpose of giving our customers an opportunity to become familiar with the various varieties of the best hardy types which we have found suitable for this climate.

—SQUARROSA VAR. K & C

MOSS RETINOSPORA

A sport of Squarrosa Veitchi first obtained in our nursery and propagated by us in 1925. In habit it resembles Obtusa Gracilis, its color is bluish gray. Plants in our nursery have withstood a temperature of 15 degrees below zero, during the winter of 1934-35 without burning, holding the blue-gray all winter. A new interesting, picturesque and useful variety, slow compact grower.

—C. HELLERI, 2' (EVERGREEN)

HELLER'S JAPANESE HOLLY

A dwarf compact variety of *Ilex crenata*, which assumes a natural low mounded form without shearing. The dark ever-green foliage makes a pleasing contrast when used in combination with flowering shrubs and evergreens. Here is an ideal low-growing evergreen shrub for your garden. Plant it in your shrub border, use it as a low hedge, or find a place for a specimen in your rock-garden or foundation planting.

INSECTICIDES

SPRAYS

OUTDOOR CHRISTONINE—Recommended for general use on shrubs, evergreens, shade trees, perennials and bedding stock.

Quarts	1.00	1 Gal.	3.50
½ Gal	1.85	5 Gal.	14.00

INSECTICIDES (CONTINUED)

INDOOR CHRISTONINE—Recommended for control of scale and insects on greenhouse plants. Will not leave undesirable residue on foliage.

Quarts85	1 Gal.	3.00
½ Gal.	1.50	5 Gal.	12.00

SPECIAL CHRISTONINE—Contains a special carrier as a spreader for use with Arsenate of Lead, Bordeaux, Lime Sulphur or Thripdust; giving better and more uniform coverage, making a combination contact and stomach poison. May be used by itself as a contact spray.

Quarts	1.00	1 Gal.	3.50
½ Gal.	1.85	5 Gal.	14.00

DUSTS

POMOGREEN—without Nicotine. Useful for control of mildew and leaf-eating insects.

5 lb. Carton	1.75
100 lb. drum	22.50

THRIPDUST—Contains 1% Rotenone, safe to use on fruit and vegetables as it is non-poisonous.
